## TRAINEE DAY 2023 at the ASBD 13th Scientific Meeting

Thursday, 14th September 2023

ASBD is proud to invite you to the free Trainee Day at the ASBD 13<sup>th</sup> Scientific Meeting this year in Adelaide.

The program offers a workshop format of learning and reflection, dedicated to medical trainees in any specialty that is part of the multidisciplinary management of breast cancer and breast diseases. The sessions harness topics of particular interest to medical professionals early in their career.

Inspiring experts will come together to share many skills and tips essential for your career and personal development as a junior consultant. You will also have the opportunity to engage with the ASBD and network with your multidisciplinary colleagues who are also looking to build their practice beyond the training years.

This initiative is aligned with the ASBD ethos and priorities as identified by the ASBD Executive Committee and will be facilitated by the ASBD Directors and other experienced clinicians in various fields.

Numbers are strictly limited and registration for the trainee day is **FREE** for trainees whose registrations are accepted. **You must be registered to attend the ASBD 13<sup>th</sup> Scientific Meeting to be accepted for the trainee day.**

**NOTE:** Do not register for any ASBD workshops during your conference registration as the Trainee Day takes place at the same time as ASBD workshops (8:30—16:30, 14th Sept. 23)

### TOPICS

- Leadership and Teamwork for an effective MDT
